MCL Mobile App (Phone) FAQ Guide

How do I log in to the MCL Mobile App?

After opening the MCL app, enter your credentials on the home screen.

How do I navigate the MCL app?

After logging into the MCL app, you will see the following icons at the bottom of the screen in the menu bar for the sections: "Checklists", "Reports", "Tasks" and "Configuration". Use the menu bar to switch between sections, access settings, and manage your profile.

What do the 4 icons in the MCL app in the bottom menu bar mean?

The symbols in the MCL app mean:

- Checklist
- Reports
- Tasks
- Configuration

How do I start a checklist in the MCL app?

Open the Checklists tab in the MCL app and select a checklist.

- Choose between "Routine Check" or "Special Check".
- When unlocked, select your desired departments.
- Adjust the order of the departments as needed.
- "Start checklist" will take you to the checklist.

How do I end a checklist in the MCL app?

After the last checklist question, an area will appear in the MCL app which you can store your electronic signature if activated. Click on the "Complete report" button below to end the checklist. The report will now be uploaded to the system. Now you can choose the extent to which the report is sent (full report, results only, or tasks only).

How do I navigate through a checklist in the MCL app?

Use the arrows at the bottom of the screen to navigate through the checklist in the MCL app. Additionally, on the iPhone, you can swipe left or right to switch between questions.

What is the difference in the MCL app between the checklist setting routine control and special inspection?

"Routine control" is intended for regular, recurring checklists, while "special control" is used for ad-hoc or one-time audits in the MCL app. This distinction helps to categorize checklist types so that these criteria can be filtered in the comparative data analysis.

How do I switch between non-consecutive departments within a checklist in the MCL app?

In the MCL app switching between departments that are not consecutive is currently only possible in iOS.

- Select the magnifying glass icon (top left corner).
- The list of all departments of the checklist appears. Select the desired department you want to jump into.
- Department marked in black means that the department has already been answered in full.
- Department marked in red means that not all questions have been answered yet.

- The number of unanswered questions per department is in the square brackets after the department name.

What do the symbols and icons in the checklist mean in the MCL app?

These icons and symbols are part of navigating through a checklist in the MCL app:

- Camera icon: Add photo.
- Microphone icon: Speak a comment. 500 characters are possible.
- Door icon: Save and leave checklist.
- Red frames indicate required fields (photo or comment required).
- Magnifying glass: Switch between non-consecutive departments.
- Navigation pane Departments: Display how many departments within the checklist have already been closed and how many are still open.
- Questions navigation pane: View how many questions within the current department have already been closed and how many are still open.

How do I add photos to a checklist question in the MCL app?

- Tap the camera icon to take a photo using the MCL app's built-in camera.

- Use the zoom function or markers to highlight details.

- For some questions, these attachments are mandatory. In these cases, the photo icon is outlined in red.
Attachments improve the traceability and quality of the reports.

How many photos can I add to a checklist question in the MCL app?

In the MCL app you can add up to 3 photos.

How do I add comments to checklist questions in the MCL app?

In the MCL app, you can attach a note to complement your answers.
- Tap the comment box and type the note using the keyboard.
- You can also record the note using the microphone icon. Attention, this is only possible if you have an internet connection.
- For some questions, these attachments are mandatory before sending. In these cases, the comment field is outlined in red.

Attachments improve the traceability and quality of the reports.

When can I swipe a task in the MCL app?

Swiping (=wischen) to complete a task in the MCL app only works if no photo or comment is required to complete the task.

- Go to the task overview
- Move the task from right to left.
- Select the option "Complete task?" that appears in a red block.
- If the task cannot be swiped, you know that a photo/comment is necessary.

Where do I see my tasks in the MCL app?

In MCL app’s menu area "Tasks" you have an overview of all tasks. Depending on your role, you'll see all the tasks you've created and assigned to you.

Where do I filter for tasks in the MCL app?

Go to the task overview in the MCL app:
- Select the funnel icon (top left)
- Decide whether to filter by due date or creation date.
- Adjust the search period or other criteria such as responsible person, market or status.

I can't find my tasks in the MCL app, what should I do?

Adjust the filter settings of the tasks in the MCL app. It usually helps to switch from the due date to the creation date (or vice versa). To do this, go to the task overview:

- Select the funnel icon (top left)

- Depending on which was set first, move the slider from the due date to the creation date (or vice versa).

Can I create tasks directly from a checklist in the MCL app?

Yes, in the MCL app you can create a task from any checklist.
- Tap the Add Task icon in the question view (dot at the bottom of the screen).
- Fill in the Market, Description, Assigned To, and Due Date, and optionally add a photo.
- Tap Save.
- Once the checklist is completed, the task is added to the overall task list.

How do I add photos to a task in the MCL app?

When creating or editing a task in the MCL app, tap the photo icon to attach images.
- Take a photo using MCL's built-in camera.
- Use the zoom function or markers to highlight details.

What options do I have in the MCL app after completing a checklist?

After the electronic signature, choose one of the following options:
- Send full report
- Send results only
- Send tasks only

You can either send the report by e-mail, by entering an e-mail or by using a stored address directory or view it as a PDF on your device in the MCL app.

Why doesn't my newly created task appear in the list in the MCL app?

Tasks may not appear in the task list of the MCL app if they were not saved when they were created, or if the app was not synced, or if the wrong filter (Created On/Due Date) was selected.

How do I complete a task in the MCL app?

There are 2 ways to complete a task in the MCL app.
- Option 1 - Complete task via swipe if no photo or note is needed.
- Option 2 – Complete task via note, in which the slider is set to "Complete task" "Yes".

Can I review completed tasks in the MCL app?

Completed tasks remain in the MCL app task list for documentation. Filter for these.

How do I complete a task from a note in the MCL app?

Completing a task via a note works differently on mobile MCL app than on tablet MCL app. These are the individual steps:

Cell phone:

- Go into the task and tap on the icon in the top right corner.
- The notes section opens.
- Set the slider to "Complete Task", "Yes" and tap "Add".
- If a red frame appears around the photo and comment field, it means that they are necessary to complete the task. Once you add either of these, you can complete the task.

Tablet:

- Go to the task overview
- Tap Note on the task you want to complete
- The notes section opens. Select the icon in the top right corner.
- Set the slider to "Complete Task", "Yes" and tap "Add".
- If a red frame appears around the photo and comment field, it means that they are necessary to complete the task. Once you add either of these, you can complete the task.

What are the differences between the MCL app on the mobile phone and on the tablet?

There are several differences in the use of the MCL app on mobile phones or tablets. While the MCL app is displayed in portrait mode on the mobile phone, the app is displayed in landscape mode on the tablet. The biggest difference is in the task overview:

- Tasks cannot be tapped on the tablet.
- Each task has the options "Note" and "Overview" at the end of the task name
- Options "Create note" and "Change task" can be accessed via the "Note" button in the task overview
- Button "Overview" shows all information about the task
- On the tablet, the photo/comment obligation is displayed behind the task name. On the mobile phone, this is displayed next to the due date

How do I recognize a photo/comment obligation of a task in the MCL app?

In the MCL app you can tell whether a photo/comment obligation of a task is due to the fact that the task name or Next to the due date is "(photo/comment)".

What icon do I press in the MCL app when I want to change a task?

The symbol "3 strokes with a pen" symbolizes the possibility to change a task in the MCL app.

Where can I find the icon in the MCL app to change a task?

You can only change a task in the MCL app if you have the "Company Administration" role or if you are a task creator. Cell phone:

- Tap the task. The task description opens.
- Select the icon "3 strokes and a pen".
- Adjust the data you want and select "Save"

Tablet:

- Go to the task overview.
- Select "Note" of the task you want to customize.
- Select the icon "3 strokes and a pen".

- Adjust the data you want and select "Save".

In the MCL app, how do I sync my app if data is missing?

If checklists, tasks or reports are not visible in the MCL app, go to the "Checklists" icon. Depending on your device, you will now be taken to the checklists or checklist and market overview. Now the app should sync automatically. If this does not happen, please log out and log in again.

Can I send checklist results as an email in the MCL app?

Yes, from the MCL app you can send the report by email. In addition to the predefined recipients, they can decide on an ad-hoc basis whether other people should receive the report. Enter the e-mail address either manually or select it in the stored address directory.

How to filter reports in the MCL app?

In the MCL app:

- You can filter reports by time range (start/end date)
- Only reports that are stored on the device itself and completed in the current session can be filtered

Where can I see information about a checklist in the MCL app?

In the MCL app all important information about the checklist is under the checklist name

- Rhythm (e.g. always open (n.z.), daily, weekly or monthly
- Time from – to
- Status "In Progress"

Where can I get an overview of all checklists in the MCL app?

After selecting the market in the MCL app, you will automatically be taken to the checklist overview.

How do I select a department in the checklists in the MCL app?

To select a department in the MCL app, proceed as follows:

- Select checklist

– available departments are listed

– Select department

How do I change the department order in the MCL app?

To change the department order in the MCL app, go to the 3 lines in the checklist configuration for the listed departments and drag and drop the department to the desired place.

What types of questions in the MCL app are there in the checklists?

There are the following question types in the MCL app:

- Yes/No Questions
- Evaluation questions 1-5, where 1 is the best rating
- Free text, e.g. for general statements
- Temperature issues
- Target/actual adjustment
- Number

How is the photo and comment obligation determined?

The photo and comment obligation is defined in the question creation and leads to more binding when filling out the checklist. The obligation is set in the dashboard and cannot be changed in the MCL app

How do I enable voice input in the MCL app?

For both tasks and checklists, voice input is activated by pressing the microphone icon in the MCL app. Up to 500 characters can be entered. Voice input is only possible in online mode.

What does N.Z. mean in the MCL app?

In the MCL app N.Z. stands for "Not Applicable" and can be activated via the slider for a checklist question if this question cannot be answered, e.g. because the department does not exist in the store. The answer is then not taken into account in the evaluation.

How can I copy a checklist question in the MCL app Android?

In the Android MCL app version tap long on the checklist question you want to copy. The text will be highlighted and the "Copy" option will appear. Tap Copy to copy the selected text to the clipboard.

Can I copy just part of a question in the MCL app instead of the whole text?

Only in the Android MCL app version. Drag the blue markers that appear after text selection to adjust the highlighted area. This allows you to copy only the part of a question you want in the MCL app.

How do I paste a copied question into another field in the MCL app?

Navigate to the desired input field (e.g. task description or comment field) in the MCL app. Tap the box once, and the "Paste" option will appear. Tap Paste to paste the copied text.

Where can I insert text in the MCL app?

You can paste copied checklist/task texts into any editable text field within the MCL app – including task descriptions, comment fields, or note areas. This allows you to easily reuse or reference question content.

How can I copy a checklist question in the MCL app iOS?

In the iOS MCL app versiontap the checklist question you want to copy. The text is highlighted and is automatically copied and copied to the clipboard.

Can I duplicate content between checklists in the MCL app using this method?

Yes, you can copy text from one checklist and paste it into another, as long as both are accessible in the same session. Note that the contents of the clipboard may be lost if you log out of the MCL app.

Why doesn't the "Copy" option appear in the MCL app when I hold a question?

If the Copy button doesn't appear in the MCL app:

- Make sure the question text is selectable (some text areas don't allow copying).
- Try pressing and holding a little longer if you use MCL in Android.
- The button appears only on Android devices. In iOS, the text only appears blue. Now you know that the text is already saved to the clipboard.

Why did I lose my checklist progress in the MCL app after I closed the app?

If you simply close the MCL app, potentially unsaved work will be lost. Always use the door icon to exit the application properly and save your progress before closing the application.

Why can't users see the checklist I created in the MCL app?

This issue typically occurs in the MCL app when the checklist is not shared with the required role. Check the checklist settings or contact your MCL administrator.

Why are some departments missing from the checklist in the MCL app?

If some departments are missing from the checklist you see in the MCL app, it may be because the departments in the checklist do not match the departments in your market. Please check the checklist and store settings or contact your MCL administrator to make a comparison.

Why are some questions missing from the checklist in the MCL app?

When you select a department in the checklist builder, not all related questions are automatically taken into account. Once you've selected the departments, manually select each question you want to include in the checklist.

Why is my checklist not active in the MCL app at the right time period?

When you don’t see a checklist in the MCL app either the start and end date or the start and end time may be misconfigured. Check your date and time settings. Only use "N.Z." for checklists, which should always be available. Please check the checklist settings or contact your MCL administrator.

What happens in the MCL app if I forget to click "Done" in the checklist creation?

Your previous settings will be saved in the Dashboard. The checklist will remain inactive and unpublished for the MCL app until it is finally completed. Always click "Complete" at the end of setup to save and activate your checklist in the MCL app.

Why can't I change a task I've already started in the MCL app?

Once a task's status changes to In Progress or Completed, edibility is limited. This means that in the MCL app only task creators and users of the "Company Administration" role can change tasks which still have status "Not started" status in the MCL app.

Can tasks be changed again in the MCL app?

Once a task's status changes to In Progress or Completed, customization is limited. This means that only task creators and users of the "Company Administration" role can customize tasks of the "Not started" status in the MCL app. Use the dashboard to modify tasks that are "in progress."

Why doesn't the progress in the MCL app of my checklist show up on another device?

The progress of a checklist is device-bound in the MCL app, i.e. it is only stored on the device on which you started the checklist.

Why can't I create tasks in the MCL app?

In the MCL app an internet connection is required to create tasks from the task pane. Make sure your device is online before adding new tasks. Tasks created offline can only be created within a checklist and are not saved until the connection is restored.

How do I fix sync issues in MCL app?

If checklists, reports, or tasks are missing from the MCL app:
- Make sure your device is connected to the internet.
- Go back to the checklist overview. The app will now sync automatically.
-If the synchronization does not happen automatically, please log out of the app and log in again.

What are the roles in the MCL system?

The MCL system includes the following roles:

- Company management
- Management
- District management
- Market management
- Head of Department
- Head of Department
- Checklist management
- Examiner
- Team

Each role has specific access to checklists, tasks, reports, analytics, and configuration areas.

Who can create, edit, or delete checklists in the dashboard?

Only the Company Manager, Reviewer, and Checklist Administrator roles can create, edit, or delete checklists in the MCL Dashboard. The role of managing director can only view the checklist overview in the MCL Dashboard.

Who can view reports in the MCL Dashboard?

All MCL roles except for the checklist management can access the "Reports" tab in the MCL Dashboard.

What roles can analytics view in the MCL Dashboard?

All roles except checklist management have access to the "Data Analysis" tab in the MCL Dashboard.

Can store managers assign tasks to other roles in the MCL app?

Yes store managers can assign tasks to other roles in the MCL app, but the other role must be assigned to their store.

Can department manager assign tasks to other roles in the MCL app?

Yes department manager can assign tasks to other roles in the MCL app, but the other role must be assigned to the same store(s).

What access does a managing director have compared to the company administration?

- Company Administrator: Has complete control over the entire organization.
- Managing Director: It is a pure overview role, which is why they have full transparency about all checklists, tasks and settings of all markets. It can answer all checklists and view every task, but it can only manage self-created tasks and not receive any tasks.

What access does the role “Prüfer” have compared to checklist management?

- Checklist Manager: Can view all markets and has full access to checklist and question management and creation. This role cannot access user management or configuration settings. Tasks can only be created and managed via the MCL app.
- "Prüfer”: Has full access to the company's configuration and management, except for the Security pane. This role cannot receive tasks.

What is the difference between department management and department supervisor?

The roles have identical permissions and only differ in that in the app, the department head can view all tasks created in the store, but the department head can only see their tasks (for them and tasks created by them).

What access does the department manager have compared to the department supervisor?

- Head of Department: The role can view checklist results (reports, data analysis, and photo management) as well as access task management, without the ability to create individual tasks. Everything related to company and checklist management is hidden. In the MCL app, only self-created or own tasks can be viewed.

- Department Manager: The role can view checklist results (reports, data analysis, and photo management) as well as access task management, without the ability to create individual tasks. Everything related to company and checklist management is hidden. In the MCL app, all tasks that have been assigned within the store can be viewed.

What roles can be given tasks?

All roles except the auditor and the executive can be given tasks.

What roles can create tasks from the MCL Dashboard and MCL app?

- From Dashbard: All roles except the checklist manager. The department and department heads have as a restriction that they can only send tasks to all their stores in bulk and cannot create individual tasks.
- From the MCL app: All roles

What roles can see all markets?

All markets can be seen by all roles that are not assigned to specific markets. These are the roles: company administration, management, auditor, checklist management

Which roles can only be seen by assigned markets

Only the markets assigned to them can see the roles of District Manager, Store Manager, Department Manager, Department Manager, and Team Member.

Who can manage the company's configuration settings in the MCL dashboard?

Only the company administrator has full control over company configurations, markets, and department settings in the MCL dashboard. Other roles have limited access or none at all.

When does the MCL app send task notifications?

The MCL app sends notifications about new and due tasks with assigned due dates. Notifications appear up to three times a day: in the morning (8:30 a.m.) and afternoon (2:30 p.m.) for new tasks, and in the early morning (7 a.m.) for due tasks.

What are the requirements to receive notifications in the MCL app for tasks?

The following requirements must be met to receive notifications for tasks in the MCL app:
- The task must have a due date.
- Device notifications must be enabled for the MCL app
- To activate the permissions, log out of the app once and log in again.

What is the difference in the MCL app between new and due task notifications?

- New task notifications: Sent at 8:30 a.m. and 2:30 p.m. to the MCL app when new tasks are assigned to you.
- Task due notifications: Sent at 7:00 AM to the MCL app for tasks that are due that day.

How does the MCL app display notifications on the device?

- Outside the MCL app: Notifications appear in the device's Notification Center.
- In the MCL app: A pop-up will appear with options to view or close tasks.

What happens if I click "View" or "Cancel" in a pop-up in the MCL app?

- View: Opens a filtered task list of new or due tasks in the MCL app.
- Cancel: Dismisses the notification and prevents it from appearing again for this task in the ML app.

In the MCL app, where do pop-up notifications appear in the app?

Pop-ups appear in key areas f the MCL app such as the Market, Checklist, and Task Overview, as well as in the reports, but are designed to not interrupt data entry.

Are there any differences in the MCL app in the presentation of task notifications in Android and iOS?

Yes, the only difference is that in Android, a number on the MCL app icon indicates how many tasks the app wants to inform you about.

Why am I not receiving notifications in the MCL app?

- Sign out and sign back into the MCL app to update the notification permissions.
- In the device settings, make sure that your device allows notifications for MCL app.
- Check that the task has a due date and has not already been completed.

Can I turn off MCL notifications entirely?

Yes. Go to your device's settings, open the "Notifications" menu, and turn off notifications for the MCL app.

How can I troubleshoot filtered task view issues in the MCL app?

If the filtered list doesn't open after you click View, manually open the task menu. The MCL app should now synchronize independently and display the filtered view.

Who can I contact if I need assistance with notification?

In case of technical problems with the MCL app or Dashboard, contact MCL support at support@x2-solutions.de.

What is the MCL app and how does it improve operational efficiency?

The MCL app is a digital platform that replaces manual checklists and task management with an integrated, mobile solution. It improves efficiency by documenting, transparent, and centralizing task tracking, reporting, and accountability across stores, helping teams work faster and with fewer errors.

In how many markets is MCL currently used?

MCL is used in over 550 markets. Each week, approximately 8,000 checklists, 25,000 photos, and 1,800 tasks are supported across the user network. (As of May 2025)

What are the measurable benefits in the MCL app in daily operations?

- Increase efficiency and productivity in your stores
- Optimize quality management with real-time tracking.
- Digitize and standardize control processes at the store level to achieve better transparency.

What is the purpose of the "freshness check"?

The freshness check is a daily MCL app checklist for monitoring products and freshness in the store. It ensures consistent quality, cleanliness, and availability, while collected data (including photos) can be analyzed to identify trends and improve sales.

How can tasks and checklists be completed in the MCL app?

Users can complete tasks and checklists directly in the MCLapp via text, photo or voice input. The app supports both online and offline data entry, making it reliable for all store environments.

What platforms does MCL support?

The MCL app runs on Android and iOS devices as well as on MDE scanners. It can be downloaded from the Google Play Store or Apple App Store, and no IT integration is required to set it up.

How do I delete photos in a checklist in the MCL app?

In the MCL app you can delete a photo that has already been added to a question, tap the photo. The built-in camera will open and you can take a new picture.

How do I change the language in the MCL app?

- Tap on the "Configuration" icon in the menu area of the MCL app
- Select "User Management"
- Select the desired language by tapping on it. Available in German, English and Spanish

Does the MCL app work without Wi-Fi?

Yes, you can use the MCL app without an internet connection. The prerequisite for this is that you have the app synchronized at the beginning of the day before switching to offline mode. Please note that tasks can only be created in online mode via the "Tasks" menu area.

What happens in the MCL app if I change devices during an active checklist?

MCL app progress is not transferred between devices. If you log in from a new device after starting a checklist, you will not be able to continue the previous session.
